

Be on the safe side of static control with InterStat and Compostat.

At Pandel, Inc., we're proud to bring you the electronics industry's finest static dissipative products. In fact, we're so proud that we sign our work. Only the Compostat quality control system provides you with product lot codes to ensure traceability on our work surface matting. If there's ever a problem, you know and we know exactly where the product came from and when it was manufactured. We can even provide copies of electrical quality control reports by lot code.

Whether designing a single electronics assembly station or developing static safe flooring, Compostat products provide the safest, most cost effective static dissipative surfaces for practically any environment. All Compostat work surface products are electrically compatible with static dissipative high-pressure laminates. For more information and specifications on the complete line of Compostat products, simply contact your nearest Compostat Distributor.

WORK SURFACE MATTING

3 Layer Static Dissipative

Blue, static control, 10¹¹ to 2 x 10¹⁰, 10¹¹ to 3 x 10¹⁰ or 10¹¹ to 4 x 10¹⁰ Layer Static Dissipative

18" x 2' to 100' x 3' or 100' x 4' to 100'

InterStat™

InterStat® table matting utilizes a proprietary 3 layer construction consisting of a conductive metalized fleece sandwiched between a solid vinyl top surface and a foam bottom layer. InterStat® will perform equal or better than the industry leaders...at an affordable price.

HR Mat™

High Reliability Compostat with buried conductive layer, 10¹¹-10¹⁰ ohms R₁₁ and R₂₂, printed and lot coded, patent pending

The result of Pandel's years of experience producing high tech work surface matting in concert with a unique manufacturing process, HR Mat is the ultimate in static dissipative, flexible work surfaces. Solid vinyl, homogeneous construction with a buried non-carbon conductive layer gives HR Mat its superior physical and consistent electrical qualities. HR Mat has virtually no voltage suppression.

Available in Blue or Grey

Available in Blue or Grey

Compostat Homogeneous Matting

Compostat homogeneous 10¹¹-10¹⁰ ohms R₁₁ and R₂₂, printed and lot coded

Compostat work surface mats are designed to provide a static safe work surface where ESD control is required. As a homogeneous polymer mix, you are always protected by a consistent, controlled static drain, with surpassed physical properties.

Available in Blue, Grey or Brown
